Construction Site Engineer

Construction Engineer with 4+ years of experience in the construction of megaprojects. Proven ability to manage and deliver projects on time, within budget, and to the highest quality standards. Worked on the construction of the Katamya Creeks, Mountain View, and Seashell Playa projects, which are three of the largest construction projects in Egypt. Successfully resolved complex construction challenges and ensured that all projects were completed safely and efficiently.

WORK EXPERIENCE

GArch • 07/2019 – Present

Site Engineer

- Plan and manage construction projects, from conception to completion. This includes developing project schedules, budgets, and scopes of work coordinating with subcontractors and vendors; and ensuring that all work is completed on time, within budget, and to the required quality standards.
- Supervise construction crews and ensure that they are working safely and efficiently. This includes providing technical guidance, resolving problems, and ensuring that all work complies with applicable safety regulations.
- Inspect construction work to ensure that it meets the project's specifications.
- This includes conducting regular inspections, documenting any defects, and ensuring that corrective action is taken as needed.
- Communicate with clients, architects, engineers, and other stakeholders to keep them informed of the project's progress. This includes providing regular status updates, responding to questions and requests, and resolving any issues that may arise.
- Prepare and submit reports on the project's progress, costs, and other relevant information. This includes preparing monthly progress reports, final reports, and other documentation as needed.
- Adhere to all applicable safety regulations and ensure that the construction site is safe for all workers. This includes conducting regular safety inspections, enforcing safety procedures, and providing training to workers on safety best practices.
