

ABOUT ME

I am a recent civil engineering graduate and a skilled graphics designer with over 4 years of experience in both fields. I graduated with a high GPA and received an honors degree for my graduation project. I work hard and learn independently, and I have many skills in civil engineering, including designing structural elements and construction work, which makes me suitable for working on-site or remotely.

JOB EXPERIENCE

I trained in the Arab Contractors Company for three months and I was a graduate project designing concrete. I designed a villa, a tower, and a high water tank and I got a degree of excellence in the graduation project.

GRAPHIC DESIGNER

2017 - Present

Online , Freelancer

I learned Photoshop from 2008 since version 7. I was really a child, but I loved software in general, adding pictures, editing them, and from that time on, my love for working on the computer and working online grew. I learned a lot of programs since then and until today.

DIGITAL MARKETING

2018 - 2022

Online , Freelancer

I have worked as a digital marketer for five years. I have worked with merchants to market their products inside and outside Egypt, and I have also marketed digital products outside Egypt in a field known as CPA .

BLOGGING

2012 - 2018

Blogger , Wordpress

I learned blogging and created some websites, including free and paid ones. Due to my love for this field, I learned many skills, including SEO (search engine optimization), and started using graphic programs to create images and animate texts.
